

# Assignment: 13

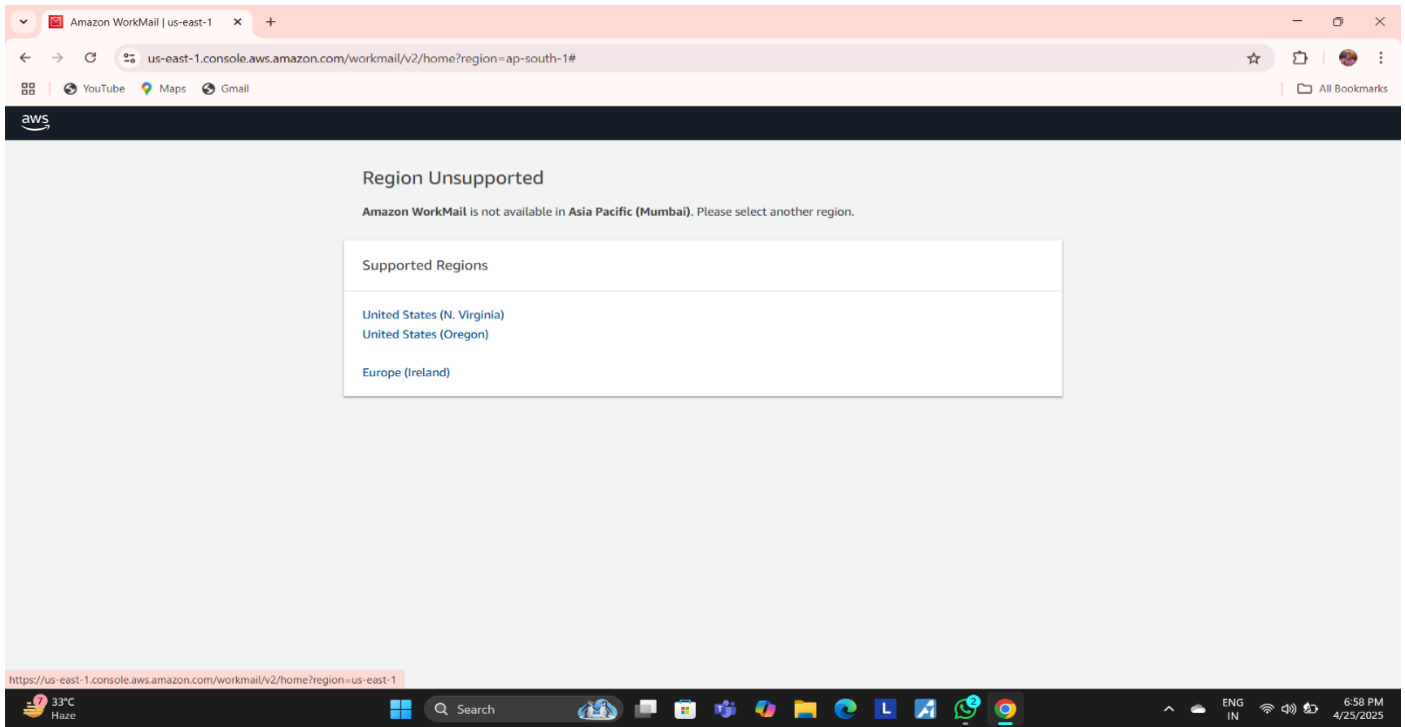

**PROBLEM STATEMENT:** Create a workmail for your organization.

STEP 1-> Search for "Amazon Work Mail" in the search bar & open it.

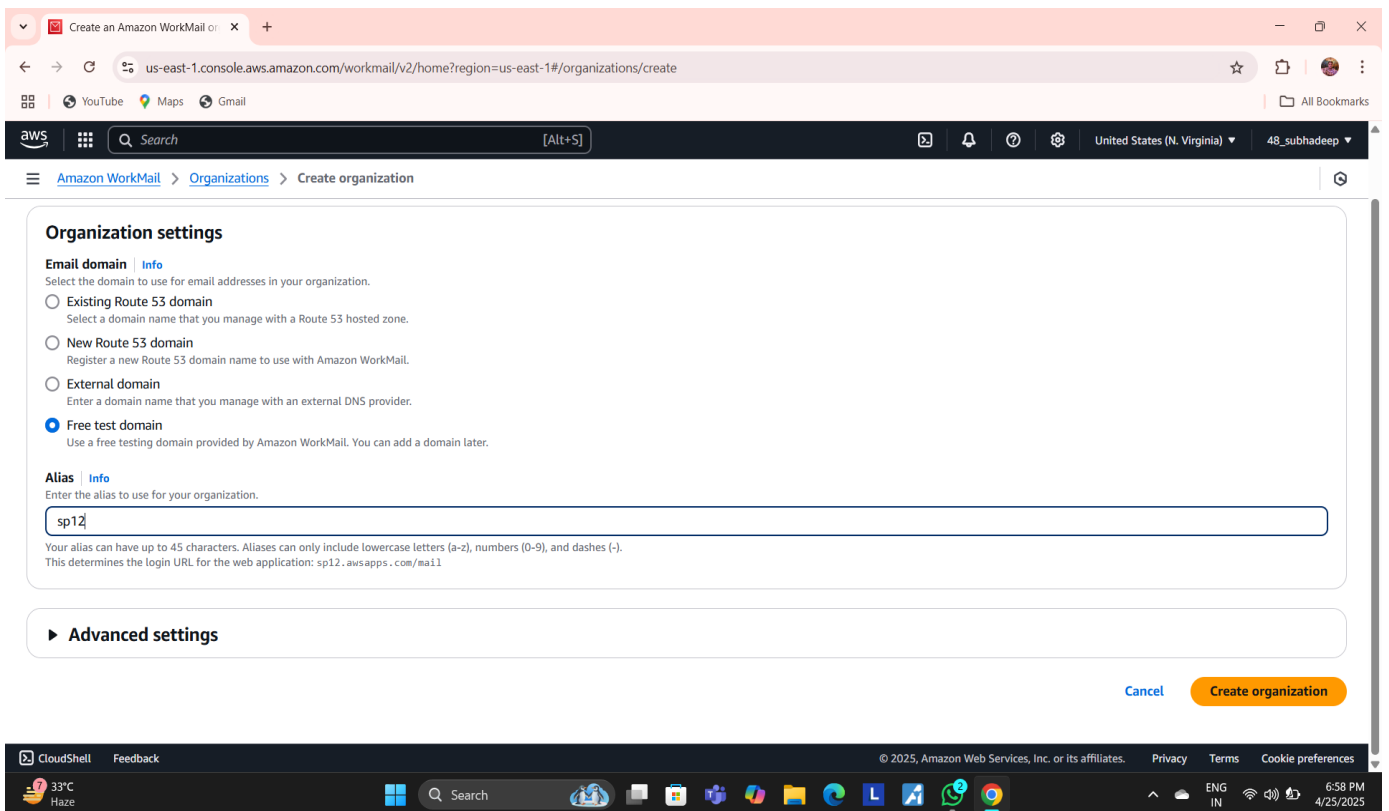

STEP 2-> Click on "Create Organization". And select (N.virginia)

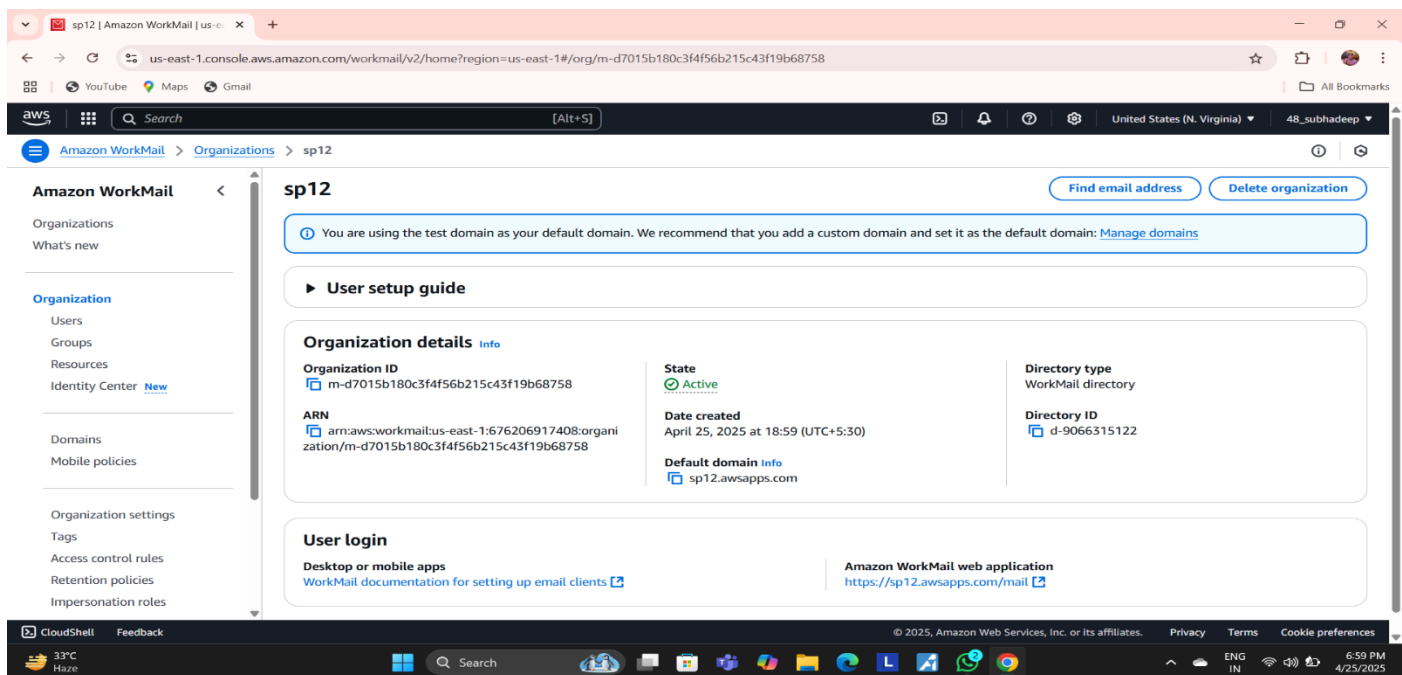

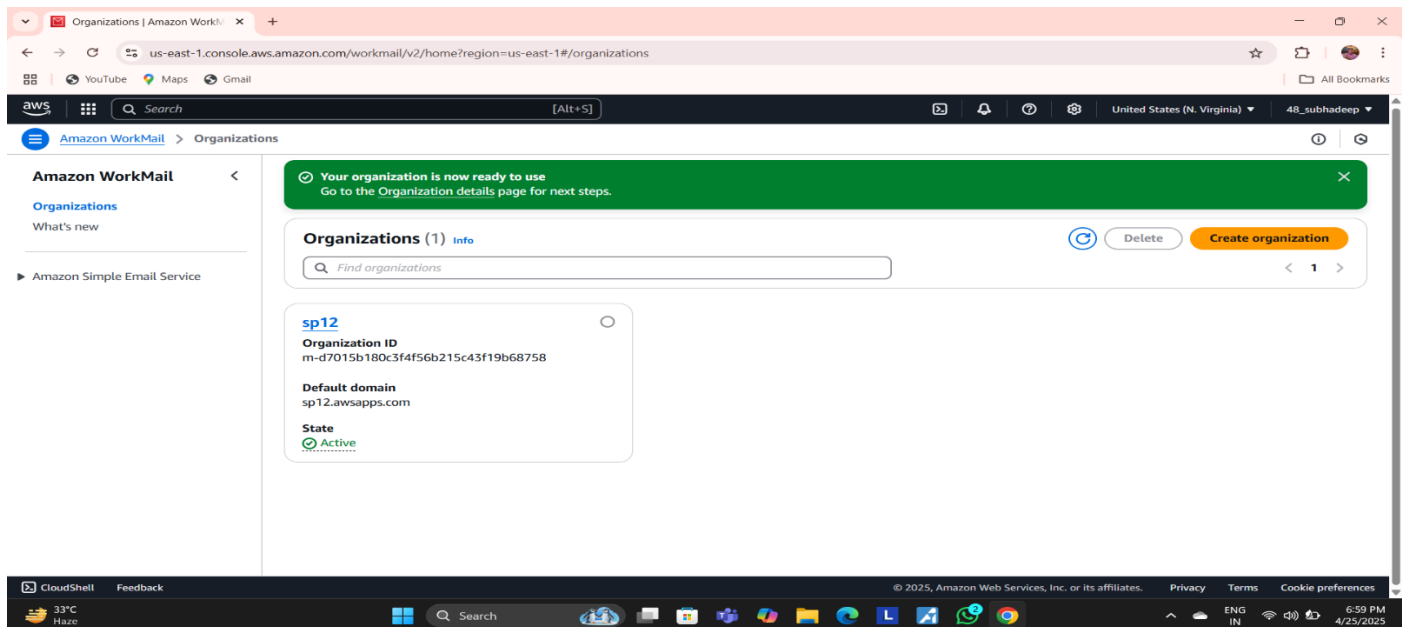

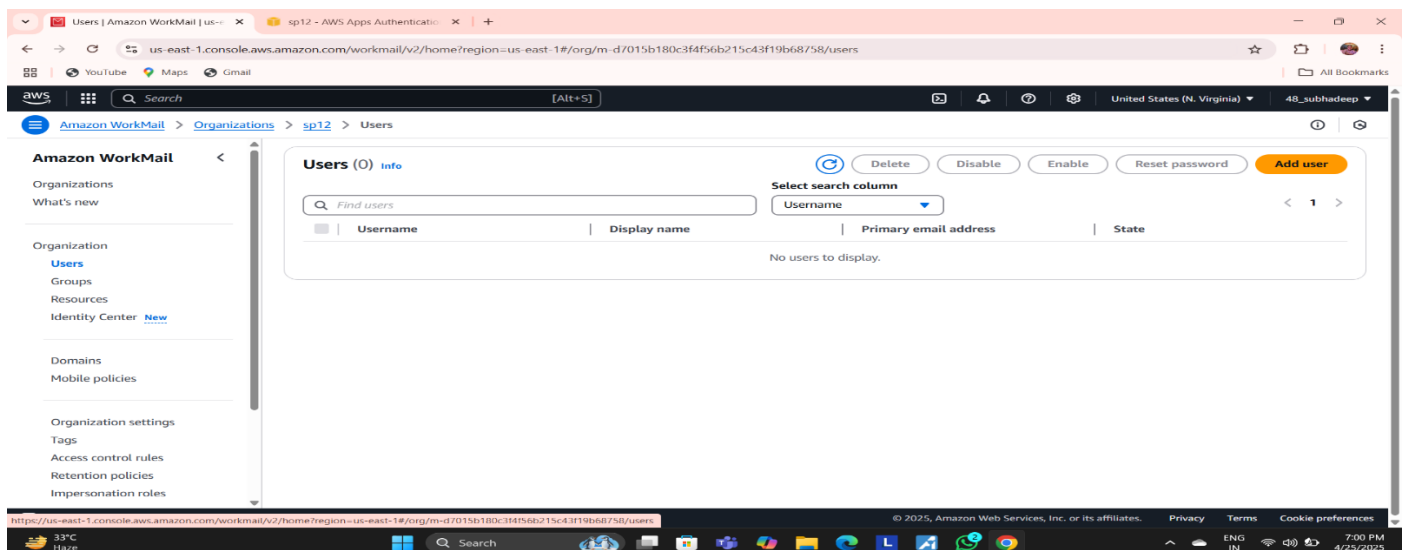

STEP 3-> Under Organization settings select "Free Test Domain". Give the organization name under alias. Then click on "Create Organization".

STEP 4-> The organization is created successfully. Click on the organization name to enter into it.

STEP 5-> From the left side menu, go to the "Users" option under Organization.

STEP 6-> Click on "Add User" button And Fill basic user details. Then Set up a password. Then click on "Add User".

The screenshot displays the AWS WorkMail 'Add a user' interface. The top navigation bar shows the path: Amazon WorkMail > Organizations > sp12 > Users > Add user. The main content area is titled 'Add a user' with a sub-header 'Add a user to your Amazon WorkMail organization.' Below this, the 'User details' section contains several input fields: 'Username' (filled with 'sp'), 'First name - optional' (filled with 'subhadeep'), 'Last name - optional' (filled with 'pan'), 'Display name' (filled with 'subhadeep pan'), and 'Email address' (filled with 'sp' and domain 'sp12.awsapps.com'). An 'Advanced - optional' section is collapsed. Below the 'User details' section is the 'Password setup' section, which includes 'Password' and 'Repeat password' fields, both currently filled with asterisks. At the bottom right of the form, there are 'Cancel' and 'Add user' buttons. The bottom of the image shows a Windows taskbar with the system clock at 7:01 PM on 4/25/2025.
