

Assignment: 15

PROBLEM STATEMENT: Create a serverless computing service

STEP 1-> Search for Lambda and click on it.

STEP 2-> Click on Create a function button.

STEP 3-> Give a name to the function and under runtime select Node.js 22.x Then click "create function".

The screenshot shows the AWS Lambda 'Create function' console. The 'Basic information' tab is active, showing the following configuration:

- Function name:** sp84
- Runtime:** Node.js 22.x
- Architecture:** x86_64

The 'Permissions' section shows the default execution role. At the bottom, the 'Create function' button is highlighted in orange.

On the right side, there is a 'Tutorials' section titled 'Create a simple web app' with a 'Start tutorial' button.

Function has successfully created

sp84 | Functions | Lambda

ap-south-1.console.aws.amazon.com/lambda/home?region=ap-south-1#/functions/sp84?newFunction=true&tab=code

Successfully created the function sp84. You can now change its code and configuration. To invoke your function with a test event, choose "Test".

No Function URL is configured.

Create function URL

Learn how to implement common use cases in AWS Lambda.

Create a simple web app

In this tutorial you will learn how to:

- Build a simple web app, consisting of a Lambda function with a function URL that outputs a webpage
- Invoke your function through its function URL
