

Assignment-2

Create MFA for authentication.

1. Log into AWS account and go to security credentials.

2. Add MFA device by clicking on 'Assign MFA device'.

3. Enter a desired device name, MFA device and then click on 'Next'.

The screenshot shows the AWS IAM console 'Assign MFA device' page. The breadcrumb trail is 'IAM > Security credentials > Assign MFA device'. The page is in 'Step 1: Select MFA device'. The 'MFA device name' section has a text input field containing 'nothing_2'. The 'MFA device' section has two options: 'Passkey or security key' (unselected) and 'Authenticator app' (selected). The 'Authenticator app' option is highlighted with a blue border and a blue circle. The bottom of the page shows a Windows taskbar with the date 2/16/2025 and time 10:24 AM.

4. Enter code using authenticator app and click on 'Add MFA' to complete the process.

The screenshot shows the AWS IAM console 'Assign MFA device' page, Step 2: Enter code using authenticator app. The page is in 'Step 2: Enter code using authenticator app'. The '2' section shows a QR code and instructions: 'Open your authenticator app, choose Show QR code on this page, then use the app to scan the code. Alternatively, you can type a secret key.' The '3' section shows instructions: 'Type two consecutive MFA codes below'. It has two text input fields: the first contains '250678' and the second contains '628972'. The bottom of the page shows a Windows taskbar with the date 2/16/2025 and time 10:26 AM.

5. MFA device assigned successfully.

My security credentials **Root user** **Info**

The root user has access to all AWS resources in this account, and we recommend following [best practices](#). To learn more about the types of AWS credentials and how they're used, see [AWS Security Credentials](#) in AWS General Reference.

Account details **Edit account name, email, and password**

Account name
48_subhadeep

Email address
subhadeeppan047@gmail.com

AWS account ID
676206917408

Canonical user ID
f44f86280219c8d642dc85ca53b0b03e7171a8edd47f0e0796be3d9a4bec158a

Multi-factor authentication (MFA) (1) **Remove** **Resync** **Assign MFA device**

Use MFA to increase the security of your AWS environment. Signing in with MFA requires an authentication code from an MFA device. Each user can have a maximum of 8 MFA devices assigned. [Learn more](#)
